## TECHNICAL SPECIFICATION

The Quartz technology is exclusive and is from M/s. Breton s.p.a of Italy. The product can be defined as a high density material as it is made of granules of high grade quartz/silica (91-93%) blended with engineered polyester resin, an organic compound that acts as a binding agent.

The sustainable aesthetic appeal of the ENGINEERED QUARTZ , is linked to the colouring given by organic pigments which can be added to the bonding agent in order to create non-naturally occurring ranges of colours with a palate of rich shades.

The wide dimensional range, the numberless chromatic possibilities, the outstanding technical characteristics and addition of heterogeneous material such as mirror makes this product ideal for Omni purpose uses.

## SIZES

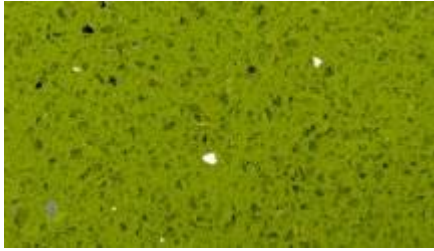

<b>TILES STANDARD SIZES IN MM.:</b>	600X600	300X600	300X300	400X400
<b>SLABS STANDARD SIZES IN MM.:</b>	1200X1800	1400X3050	1600X3200	
<b>STANDARD THICKNESSES IN MM.:</b>	10-12-15-20-30			
<b>NONSTANDARD SIZE SLABS ALSO AVAILABLE ON REQUEST</b>
